

To All of Our Patients:

Important Medication Safety Information

It is important that you maintain an accurate list of your medications, doses, and allergies to share with medical personnel whenever you are seeking medical care and treatment.

Be sure to include all prescriptions, all over-the-counter medications (cold, sinus, allergy, pain relievers, etc.) as well as any herbal/dietary supplements.

**Always keep a copy with you
in case of emergency.**

We will be happy to assist you by reviewing and updating this list during your visits.
